NEW FUTURISTIC GAMING MOUSE DELIVERS CYBORG® PERFORMANCE

SAITEK LAUNCHES FULLY ADJUSTABLE *CYBORG MOUSE* FOR PRECISE AND FATIGUE-FREE GAMING

[Saitek](#), a leading designer and manufacturer of consumer electronic products for PC and gaming, has announced the launch of its new [Cyborg Mouse](#). The high end laser mouse is designed specifically for gaming and aimed at serious gamers who play intensely for long periods at a time.

The Cyborg Mouse has a unique switch-activated motor that moves the rear shell back and forth, expanding or contracting the mouse to fit any user's hand. This not only increases control but will also prevent tiredness during long periods of game play. Mouse length can be adjusted using either a software control panel installed with the drivers, or by holding the mode button on the Cyborg mouse down and then pushing the mouse's d-pad into position.

As well as adjustable length, the Cyborg mouse also features a scroll wheel with adjustable detent force. The scroll force selector switch has three positions and sets the sensitivity of weapon selection from low to high to suit the gamer's preferences.

Other controls include a 4-way low profile hat switch plus 7 buttons. Controls are programmable using Saitek's SST programming software which, with the 3 stage mode button, effectively gives a total of 24 programmable commands to customise any gaming experience. The SST software saves chosen settings as game-specific profiles.

The 3-stage mode switch also allows the user to change mouse sensitivity to help with their aim. Adjustable from 400 dpi up to 3200 dpi, the Cyborg mouse's new anti-deceleration laser technology ensures reliable movement tracking, even at higher speeds.

With a grey and black, sleek, futuristic design, the Cyborg Mouse ensures gamers can play their favourite games with control, precision and high speed, and in complete comfort, no matter how long the gaming session.

The Cyborg Range

Saitek's new Cyborg range is designed specifically for serious gamers who demand the best equipment and includes the [Cyborg 5.1 Headset](#), [Cyborg Command Unit](#), [Cyborg Rumble Pad](#), and the [Cyborg Keyboard](#). Enthusiastic gamers will play intensely for long periods of time and need peripherals that offer outstanding comfort and durability.

Cyborg competition

For a chance of winning a Cyborg Mouse and other Cyborg accessories visit www.pimp-my-orc.com. To be in with a chance of winning Saitek prizes and a copy of [Fantasy Wars](#), a turn based battle strategy game from Ascaron, download an orc head from the site and try creating your own orc-celebrity!

System requirement:

Connectivity: USB 2.0
Windows XP, XP 64 and Windows Vista (all versions)

Notes to Editor:

Saitek's Cyborg Mouse is available from www.Saitek.com priced £39.99.

About Saitek

Saitek designs and manufactures consumer electronics products which work together to improve the user's multimedia, gaming and communications experiences. Constant innovation, superior technology and a high degree of functionality make Saitek products the choice of computer users around the world.

The Saitek product range today includes mice, keyboards, headsets, PC gaming controllers, as well as other PC peripherals. The latest addition is a new family of innovative and practical audio products designed to improve users' digital entertainment experiences. Saitek and Cyborg are registered trademarks of Saitek and its affiliated companies.

In November 2007, Saitek was acquired by Mad Catz Interactive, Inc., a publicly-listed, leading global provider of interactive entertainment peripherals.

About Mad Catz Interactive, Inc.

Mad Catz (ASE/TSE ticker "MCZ") is a global leader in providing innovative peripherals for the interactive entertainment industry. Mad Catz designs and markets accessories for video game systems and publishes video game software, including the industry-leading GameShark video game enhancements, under its Mad Catz, GameShark and Joytech brands. Mad Catz also designs and markets mice, keyboards, headsets, PC gaming controllers and other PC peripherals through its Saitek brand, and recently began manufacturing and marketing proprietary portable earphones under its AirDrives brand. Mad Catz distributes its products through most of the leading retailers offering interactive entertainment products and has offices across Canada, Europe and Asia.
