Press Release: Saitek launches the Cyborg 5.1 Headset for increased gaming realism and performance

Bristol, 14 September 2007 – Saitek (www.saitek.com) today announced the launch of the Cyborg 5.1 Headset – a Surround Sound headset designed to enhance the realism of PC games and improve gaming performance.

The Cyborg 5.1 Headset features an integrated USB sound card which delivers true 5.1 Surround Sound without the need to install a PC 5.1 card. Six sonic drivers on each side of the headset ensure true channel separation for crisp, directional sound. This precise audio tells the gamer where every shot comes from, giving them a significant performance advantage.

Like the rest of the Cyborg range, the Cyborg Headset features unique styling with satin black finish and 'distinctive Cyborg' logo which illuminates when 5.1 sound is selected. The headset comes with detachable noise-cancelling boom microphone which, as well as making the headset ideal for TeamSpeak during LAN gaming, is also perfect for VoIP communication with family, friends or colleagues.

The Cyborg 5.1 Headset connects to the PC through a USB cable but a 3.5mm audio jack is also included for use with MP3/CD/handheld devices (in stereo). Volume is adjusted or the headset muted using the conveniently positioned in-line controls.

Fully adjustable with rotating cans and adjustable headband, the Cyborg 5.1 Headset is incredibly comfortable, even over long gaming sessions. The headset's low profile design, detachable microphone and hard carry case also mean it's compact and portable – ideal for taking to LAN parties.

Commenting on the launch of the Cyborg 5.1 Headset, Richard Neville, Saitek Category Manager, said: "The Saitek Cyborg 5.1 Headset offers the ultimate performance advantage. Precision audio means gamers can tell exactly where their enemies are and also communicate more effectively with team mates. This, combined with outstanding comfort, flexibility and portability make Cyborg 5.1 Headset the tool of choice for gamers who are hungry to win."
