

Press Release: Saitek launches high performance GM2400 Laser mouse

Bristol — 20 August 2007, Saitek (www.saitek.com) today announced the launch of the GM2400 Laser Mouse – a high-performance programmable mouse ideal for PC gaming and complex, control-hungry PC applications.

The GM2400 features a striking design, button backlighting and advanced ergonomics with finger contours, side grips, and intuitively positioned buttons for maximum comfort. The mouse's six buttons are all programmable using Saitek Smart Technology software and programs can be saved as game or application-specific profiles and loaded with the click of a mouse.

High performance laser technology gives the GM2400 great tracking speed but not at the expense of control and precision. Mouse speed can be switched on the fly (800, 1600, 2400dpi) using the easy-to-reach speed mode selector button to match the tasks being performed: high-speed for fast tracking over large screen sizes; low-speed for greater sensitivity for close-up, detailed work. Selected speed is clearly indicated by the on-board backlit indicator.

Ultra-smooth, PTFE feet make the GM2400 glide effortlessly over almost any surface and an extra-long lightweight, non-tangle Hi-Speed USB 2.0 cable gives complete freedom of movement.

Commenting on the launch of the GM2400 Laser Mouse, Maggie Heeley, Saitek Category Manager said: "With its switchable DPI setting, ultra-smooth glide and great accuracy, our new GM2400 mouse will appeal as much to gamers who need a high-performance tool for FPS games, as PC users who demand accuracy and detail from their mouse to increase productivity. The ergonomic design, wealth of controls and programmability mean the GM2400 is perfect for a host of applications especially gaming."

Compatible with all versions of Windows XP and Vista, the GM2400 Laser Mouse is the high-performance addition to the serious PC user's setup.

About Saitek:

Saitek designs and manufactures consumer electronics products which work together to improve the user's multimedia, gaming and communications experiences. Constant innovation, superior technology and a high degree of functionality make Saitek products the choice of computer users around the world.

The Saitek product range today includes mice, keyboards, headsets, PC gaming controllers, as well as other PC peripherals. The latest addition is a new family of innovative and practical audio products designed to improve users' digital entertainment experiences.
