

Press Release: Saitek expands communications range with new headset and webcams

Bristol — 20 August 2007, Saitek (www.saitek.com) today announced the expansion of its communications range with the launch of the new WH30 Webcam and Headset, and W300 Face Tracking Webcam. The new webcams and headset build on the success of Saitek's headset products designed for use with VoIP and other messaging applications.

The W300 Face Tracking Webcam offers clear, high quality video, a durable design ideal for both notebook and stand alone computers, easy-to-use, secure clipping mechanism and built-in microphone for clear communication.

Face tracking software keeps the subject focused and in the centre of the picture, even when moving around, while low light and bright light sensor gives the best possible picture exposure. The W300 Face Tracking webcam sensor outputs 300k VGA resolution, guaranteeing high resolution images with 30 frames per second for flicker-free video, plus a snapshot button for taking and sending still images.

The WH30 Webcam and Headset is an all-in-one camera and headset solution for internet communication. The webcam shares the same durable design and 30 frames per second flicker-free video as the W300, plus 300K (software enhanced) VGA resolution, automatic light balance for low and bright light conditions and a simple plug and play installation.

The ultra-comfortable headset features echo-free speakers with integrated microphone arm for clear, hands-free, uninterrupted communication.

WH30 Webcam and Headset

W300 Face Tracking Webcam

Commenting on the launch of the WH30 Webcam and Headset, and W300 Face Tracking Webcam, Felicity Head, Saitek Product Manager said: "As broadband speeds get faster, PCs are increasingly being used as tools for communicating with friends and family, not just by email or voice but also video. Our new webcams and headset are designed to be extremely simple to use, but still offer high quality video images and sound to make the communications process as effective and fun as possible."

About Saitek:

Saitek designs and manufactures consumer electronics products which work together to improve the user's multimedia, gaming and communications experiences. Constant innovation, superior technology and a high degree of functionality make Saitek products the choice of computer users around the world.

The Saitek product range today includes mice, keyboards, headsets, PC gaming controllers, as well as other PC peripherals. The latest addition is a new family of innovative and practical audio products designed to improve users' digital entertainment experiences.
